CONSENT FOR AUTOPSY

Date: _____ Time: _____ (Patient Label Here) _____

An autopsy is an external and internal examination of the body after death using surgical techniques. The examination is performed by a pathologist. The examination uses surgical incisions to allow observation and removal of organs. These incisions will not involve the face or any other part of the body what would be visible during viewing. The clothed body will look the same with or without the autopsy.

The primary purpose of an autopsy is to answer any questions the family or physician may have about the illness, cause of death, and/or any co-existing conditions. Establishing a cause of death can be a source of comfort to families. The autopsy may also determine whether there are inheritable problems and help other family members through early diagnosis and treatment. Furthermore, what is learned through an autopsy on one patient may help save the lives of others with similar conditions.

- 1) I authorize the examination, removal, and retention of organs, tissues, implanted devices, and fluids as the pathologists deem necessary for diagnosis, education and research. I understand that the remaining organs and tissues will be disposed of appropriately and in accordance with law.
- 2) I understand that I may limit either the extent of the examination or the retention of organs, tissues, or devices. I understand that limitations may decrease the information obtained from the examination. I have been given the opportunity to ask any questions that I may have regarding the scope or purpose of the autopsy. If any questions remain, please page pathology at (859) 330-1598.

LIMITATIONS: _____

I REQUEST AND AUTHORIZE THE PHYSICIANS IN ATTENDANCE AT UNIVERSITY OF KENTUCKY, CHANDLER MEDICAL CENTER, TO PERFORM AN AUTOPSY ON MY:

*RELATIONSHIP TO PATIENT	SIGNATURE	DATE/TIME
